The Company's current ratio as of June 30, 2007 was ₱0.430 for every peso liability – an increase of ₱0.289 from last year's current ratio of ₱0.141. The increase was caused by additional advances from officers, payment of a partner's farm-in share in exploration projects, partial collection of subscriptions receivable, additions to prepayments consisting of listing fees, annual dues and input tax. Current ratio as of the second

quarter of 2006 was a minimal increase of ₱0.071 as compared to 2005 due additional advances from officers.

The Company's total assets which stood at ₱729.792 million in 2007, was lower than last year by about ₱21.676 million. This is due to the increase in cash and cash equivalents and deposit for future investment of ₱5.385 million and ₱34.844 million, respectively; and decrease in investments in associates and deferred exploration costs amounting to ₱51.637 million and ₱9.684 million, respectively in 2007 as compared to 2006. For 2006 the decrease was ₱28.080 million as compared to 2005 mainly due to decrease in investment in associates.

For 2006, the decrease was ₱34.232 million as compared to 2005 due to share in net losses of associates.

On December 29, 2006, the Company sold its investment in PDB for a total consideration of ₱34.844 million, resulting in a gain of ₱5.956 million. Results and Plans of Operation

SC-41 Offshore Sulu Sea Sandakan Basin

The Filipino contingent of the consortium has been in negotiations for the entry of a farminee into the block. The farminee is expected to assume certain work obligations to gain entry and acquire interest. The finalization of the farm-in is expected to be completed soon.

South China's participating interest in the block has been increased to 5.3260% after the withdrawal and redistribution of Petroenergy Resources' interest.

SC-60 (GSEC-99 Offshore NE Palawan)

The South China, Shell Philippines Exploration b.v. (SPEX) and Kuwait Foreign Petroleum Exploration Company ksc. (KUFPEC) joint operations will move forward with the committed work program filed with the DOE. The group will carry out the acquisition and processing of at least 1000 line-kms of 2D contingent on availability of a seismic vessel. The activity is expected to start sometime early second half of 2006. South China is carried on this activity.

Offshore Cuyo Platform (former GSEC-96), NW Palawan Block (Swan Block/former GSEC-83)

South China still retains one of the biggest information libraries covering these areas. DOE's 1st Petroleum Competitive Bid Round PCR-1 resulted in only one (1) contract awarded. After the evaluation phase of the bid round, the DOE opened up the country for application.

Despite of a contract application pending over the NW Palawan area by the Swan Block consortium (of which the Company is a co-venturer), the DOE awarded the area to the Philippine National Oil Company-Exploration Corporation (PNOC-EC) as SC57 and SC58. Philodrill, deemed operator of the Swan block, has informed its partners that it will seek to resolve the situation.

The DOE declared a moratorium on applications for new contract areas prior to its launching of PCR-2 (Philippine Energy Contracting Round No. 2) in August 31, 2005 and ended November 29, 2005. No new applications for exploration contracts have been accepted by the DOE outside PCR-2. To date, the DOE has yet to announce and officially award the service contracts to the winning bids and lift the application moratorium

The Company continues to actively seek strategic partners for the joint exploration of Offshore Cuyo in preparation for the lifting of the moratorium.
