Revenues- 382.47% increase from P HP 2.2 97 M illion t o P HP 11.085 Million (2010vs2009)

There is an outstanding increase in revenue growth for 1st quarter ending 2010 as against the 1st quarter ending 2009 due to interest income generated from additional investments to time deposits and other market placements. Additional placements were made to BDO, Chinabank and Premiere Bank for an aggregate amount of P HP 1.407 billion as of the end of the 1st quarter 2010. There is a minimal decrease with respect to interest rates having 4.25% average for the previous years as compared to current quarter of 4.125% for placements.

Revenues- 98% decrease from PHP 116.347 Million to PHP 2.297 Million (2009vs2008)

Total revenues generated for the first quarter of 2009 was PHP 2.297 million as against the PHP 116.347 million revenues garnered during the first quarter of 2008. There was a noted 98% change largely due to the following transactions which occurred in 2008 : (a) the 31% drop in interest income from PHP 3.328 million last March 31 2008 as against the PHP 2.297 million level this quarter March 31 2009 brought about by the decline in short-term deposit and placement interest rates as well as (b) the existence of the gain on sale of investment property to AlphaLand Corporation of PHP 113.019 MM, the sale of which occurred during the first quarter of 2008 and was considered as an extraordinary event last year. The gain on sale of investment property was gross of final taxes paid composed of capital gains taxes of PHP 36 million and documentary stamps taxes of PHP 9 million.

Expenses – 3.76% increase from PHP 2.150 Million to PHP 2.230 Million (2010vs2009)

The minimal increase of 3.76% is due to slight movement in rental and utilities, communication expenses and depreciation.

Due to relatively insignificant increase in expenses but a very remarkable increase in Revenue, the company posted a 5,884.39% increase in its income from operation.

Expenses – 98% decrease from PHP 86.602 Million to PHP 2.150 Million (2009vs2008)

Total Expenses during the first quarter of 2009 was relatively lower than the expense level during the first quarter of 2008 largely due to the following: (a) the provision of additional allowance for impairment of deferred exploration costs amounting to P HP 38.413 million during the first quarter of 2008; as well as (b) the payment of taxes and licenses of P HP 45.270 Million during the first quarter of 2008 related to the sale of investment property to Alpha Land Corporation. This was comprised mostly of the abovementioned final taxes (capital gains taxes and documentary stamp taxes) totaling PHP 45 million.

Given the above, income from operations likewise dropped by almost 100% from PHP 29.745 million to PHP 147,973.

Equity from Net Earnings of Associates- 106.17% increase from Loss of PHP4.530 million to Income of PHP279,700 (2010vs2009)

On December 18, 2009, the Company sold to Two Cassandra-CCI Conglomerates, Inc. the Company's Investment in 3,240,000 shares of the capital stock of Bell Telecommunication Philippines, Inc. at a selling price of P1, 227,825,489.00.

The 106.17% positive change in equity from net earnings of associates is due to the net income reaped by Premiere Development Bank for the 1st quarter of 2010 as opposed to the total shares in net loss of associates for the 1st quarter of previous year which is inclusive of loss by BellTel Co.

The computation for current quarter equity in net earnings of associate:

Net Income of Premiere 1 st Quarter 2010	PHP	5,814,970.74
Equity ownership in Premiere	X	4.81%
	PHP	<u>279,700.00</u>

Equity from Net Earnings of Associates- 6779% decrease from PHP67,827.00 to (PHP 4.530) million (2009vs2008)

For the first quarter of 2009, the Company recognized equity share in net losses of associates of PHP 4.531 million computed as follows:

Net loss of Belltel for the first quarter of 2009	(18,403,059.00)
Add back: Depreciation expense of revalued equipment	5,935,182.98
	(12,467,876.02)

Comprehensive Income / (Loss) – 17.61% increase from P HP803,250.00 to PHP944,699.00 (2010vs2009)

As per Philippine Accounting Standard 1: Presentation of Financial Statements, the preparation of Income Statements (now termed as Statement of Comprehensive Income) should include the presentation of comprehensive Income or Loss by the company. Comprehensive Income or loss pertains to the market increment or decrement in value of financial instruments held by the company as well as the share in changes in value of instruments held by associates.

The movement in comprehensive income of 1st quarter 2010 from 1st quarter of 2009 is not so significant as to influence the total comprehensive income or loss generated. The main factor will still be the revenue earned.

The 17.61% movement in recognized comprehensive income from 1st quarter 2009 to 1st quarter 2010 is brought about by increase in market value of Petron and Aboitiz shares.

Comprehensive Income / (Loss) – 26875% increase from loss of PHP 3000 to PHP944,699.00 (2010vs2009)

This is due to the increase in market value of available for sale investments as well as increment in value of available for sale shares of associates.

Net Income / (Loss) – 307.78% increase from PHP 4.376 Million to PHP9.094 million (2010vs2009)

Despite the decreasing trend in market interest rates, the company still showed a positive progress in its net income due to additional placements made to BDO, Chinabank and Premiere Bank from proceeds of the sale of BellTel Co.

Net Income / (Loss) – 114.68% decrease from P HP 29.763 Million to (PHP 4.376 million)(2009vs2008)

The Company incurred a net loss of PHP 4.376 million for the first quarter of 2009 as against the PHP 29.763 Million net income during the first quarter of 2008. This was primarily brought about by the abovementioned equity share in net loss of associates for the period amounting to PHP 4.531 million.

Current Assets- 773.62% increase from P HP173.310 Million to P HP1.514 billion (2010vs2009)

Due to the sale of equity shares of BellTel, the current asset of the company surge up to 773.62% since the whole proceeds was invested in time deposits. There is a slight movement in accounts receivable and prepayments thereby contributing insignificantly in the positive change of current assets.

Current Assets- 64% decrease from P HP 493.147 Million to P HP 173 .306 Million(2009vs2008)

Largely due to the 86% drop in cash and cash equivalents since the proceeds from the sale of Alphaland was invested in associates in the form of advances.

Noncurrent Assets- 87.63% decrease from PHP520.484 Million to P HP64.360 Million(2010vs2009)

The investment in associate account was decreased by PHP 324 million for the cost of the shares of BellTel and the corresponding share in net loss up to the date of the consummation of the sale. Other factors affecting the decrease in non current asset is the share in net income and other comprehensive income of Premiere Development Bank at 4.81% ownership for the 1st quarter 2010 amounting to P HP297,700.00 and 301.49 respectively.

Noncurrent Assets- 326% increase from P HP 122.254 Million to P HP 52 0.484 Million(2009vs2008)

Current Liabilities- increase of 162.30% from 231,267 to 606,602.00 (2010vs2009)

This is due to income tax payable for the year 2009 amounting to PHP 159,582.00 and an increase in accrued expenses for the 1st quarter 2010.

Current Liabilities- slight 0.78% decrease (2009vs2008)

Noncurrent Liabilities – decrease of 100% (2010vs2009)

As of 2009 the company has no more outstanding non current liabilities pertaining to the unpaid subscription amounting to P HP171.720 Million payable in favor of Bell Telecommunication as it was already fully paid prior to the sale of the shares to Two Cassandra.

Equity- 0.15% increase from PHP742.988 Million to PHP 744.078 Million(2010vs2009)

The 0.15% is due to the following: a) issuance of 840,000 additional shares.

b) PHP391, 650 increase in unrealized valuation of available for sale shares investments.

Equity- 0.04% decrease from PHP742.988 Million to PHP 743.313 Million(2009vs2008)

The increase in retained earnings of around 477.02% due to positive results of operation for the 1st quarter 2010 and a slight increase in valuation of AFS investments contributed to the 26.25% increase for the current year over the 1st quarter of 2009.

Current Ratio (in x)	1148.10X	2496.00 x	749.40 x

There has been a reported decrease in revenue growth and net income for the year 2010 as compared last year. However, this did not entails negative outcome for the current year since what composes the last year bulk of revenue was the gain earned from the sale of Belltel s hares amounting to ₱1.17B and the interest income from time deposits and savings a mounting t ₱9.9M. The 95.64% decrease in revenue growth and 96.83% decrease in net income growth was mainly due to the gain on sale of belltel shares earned last 2009. The company earned ₱51.5 0M interest income for 2010 which is about 4X of the interest income earned last 2009 which is ₱9.9M.

The company has 2.06% for its return on equity and return on a ssets for the year 2010. The decline on r rates was due to the decrease in the bottomline figure having ₱17M for the year 2010 as compared with ₱1.04B for 2009 of which it consists of the gain earned from sale of Belltel shares as previously discussed.

For the year 2009, there was an improvement in net income growth rates as against the Company's 2008 level as evidenced by the above figures. The great leap in net income for 2009 a s against 2008 w as brought by the gain earned from sale of Belltel shares as previously discussed. The big increase in revenue growth and net income growth for the year 2008 takes into consideration the revenue and net income earned by the company for the year 2007. For the year 2007, t he company earned an interest income from savings and time deposit of ₱10.96M and from advances made to Puyat Steel of ₱9.6M. It was also in year 2008 t hat the company sold the Pilipinas Plaza earning a gain inclusive of capital gains tax amounting to ₱113.019M.

Profitability for 2009 was also measured by ROE and ROA reaching 66.45% and 66.38% respectively with a big difference from the previous period. The difference pertains to the gain earned from Belltel shares as previously discussed.

The Company posted a remarkable increase for the past three years on its current ratio. The 1148.10x for 2010 as against 828.29x for 2009 was due to the interest earned in time deposits for the year 2010 amounting to ₱45.39M and interest from Puyat Steel of ₱5.97M of which has caused the increase in cash and cash equivalents composing the current assets. It can be noted in the company's financial statements that it has been consistent in its low current liabilities which are oftentimes composed of taxes withheld and employee benefits not yet remitted to the BIR and other government entities. The 828.29x for 2009 vs 289.49x in 2008 was due to the astounding increase in cash and cash equivalents amounting to ₱1.341B brought about by the investment to short term market placements of the whole net proceeds of sale of shares in Belltel as previously discussed.

The company exhibited an outstanding leverage ratio for the last three years which means that it can finance its own operation without using or relying from outside financing sources. There has been a continuous decrease in debt to equity ratio of the company for the past three years which is a very good indicator that the company is very much liquid in paying its liabilities. As per table above there has been a constant increase in the total equity of the company ₱525.42M for 2008, ₱1,567.6M for 2009 and ₱1,606.41M for 2010 of which in contrast there has been a constant decrease in the total liabilities: ₱172.317M in 2008, ₱0.86M in 2009 and ₱.714 in 2010. The ₱172.31M total liabilities for 2008 was composed of ₱171.720M subscription payable to Belltel Co. which was fully paid on 2009 prior to the sale of Belltel shares.

Earnings before interest taxes depreciation and amortization (EBITDA) for 2010 was at PHP 22.28 million though the company has negative changes in its revenue growth. The gain earned from the sale of Belltel shares make up for the ₱1,061M difference for 2010 against 2009 as well as the difference from 2009 and 2008.

Quarter ending March 2010 versus Quarter ending March 2009

There is an outstanding increase in revenue growth for 1st quarter ending 2010 as against the 1st quarter ending 2009 due to interest income generated from additional investments to time deposits and other market placements.

A great soar of 382.47% in revenue growth, minimal increase of 3.76% in expenses and 106.17% increase in equity in net earnings of associates contributed to exceptional 634.18% increase in net income for 1st quarter 2010 as against the 1st quarter of 2009.

There was an improvement in the liquidity of the company as evidenced by 2,496x current ratio for the 1st quarter 2010 due to increased in current assets with the greater portion thereof identified with cash and market placements.

There is around 0.58% both for return on equity and return on assets for the 1st quarter 2010 as compared to 1st quarter 2009 due to positive net income generated by the company for the current quarter.

A debt to equity ratio of 0.0004x proves the great stability of the company as it shows that only around 0.04 % of the total equity represents the borrowed capital as against invested.

Quarter ending March 2009 versus Quarter ending March 2008

Profitability-wise, there was a 98% decline in revenues and a 114% drop in bottom line figure for the first quarter of 2009 as compared to the positive growth levels during the first quarter of 2008 vis a vis 2007 levels. These were previously discussed under 2009 Results of Operations.

The Company maintained a high liquidity ratio during the first quarter of 2009 as evidenced by the current ratio pegging at 749.38 xs as current assets were carried at PHP 173.306 million as compared to current liabilities which was very minimal at P HP 231,267 as of end of the first quarter of 2009.

Leverage ratio evidenced by the debt-to-equity ratio of 0.33 x was at low but favorable levels.

The manner by which the Company calculates the foregoing indicators is as follows:

Key Financial Ratios	Formula
Revenue growth	(Total Revenues (current period) - Total Revenues (prior period))/Total Revenues (prior period)
Net income growth	Net Income (current period)/ Net income (prior period)
EBITDA	Income from operations plus depreciation and amortization
Return on equity (ROE)	Net income/ Equity
Return on assets (ROA)	Net income/ Total Assets
Current ratio	Current Assets/ Current Liabilities
Debt-to-equity ratio	Total Liabilities/ Equity

The funding facility extended to PSC is secured by way of assignment to the Company of finished goods inventories and all receivables and proceeds of postdated checks arising from the sale of the finished goods. The facility is renewable on a yearly basis where the Company received a guaranteed ROI of at least 8% per annum.

The receivables from South China Petroleum International represented pre-operating costs logged under accounts receivable of South China Resources Inc. This foreign company is non operational since 2003 and serves as a wholly-owned subsidiary to undertake the proposed spin-off of the company's oil exploration assets and activities.

The investment in associate account was decreased by PHP 324 million for the cost of the shares of BelTel and the corresponding share in net loss up to the date of the consummation of the sale. Other factors affecting the change in investment in associates is the share in net income and other comprehensive income of Premiere Development Bank at 4.81% ownership for the 1st quarter 2010 amounting to PHP297,700.00 and 301.49 respectively.

Results and Plans of Operation

C-41 Offshore Sulu Sea Sandakan Basin

Service Contract No. 41 ran the full length of its exploration period extending exploration activity to ten (10) contract years. The Joint Venture drilled the Lumba-lumba well in 2008. It also undertook extensive seismic processing and re-processing of the 3D seismic data in 2009 to 2010, completing the reprocessing of the Alpine 3D seismic data along consequent inversion studies and re-interpretation and prospect modelling.

The SC-41 group was given until August 10, 2010 to decide to whether or not to extend the SC by another year. Given that the next phase of the service contract would have included a work program commitment to drill an exploratory well by May 2011, it was concluded that a well was not appropriate in light of the tight schedule and a pending Philippines Energy Contracting Round.

The operator was not able to secure an appropriate farmout due in part to the tight time frame of the work program and made the decision to relinquish SC-41 prior to incurring the well commitment.

The SC-41 group views the area as still having prospectivity and may pursue exploration in the future with an appropriate work program to address the technical risks. Agreement on the composition of the new joint venture would be discussed in advance of making any application over the area, with the intent that existing partners would participate in new energy bidding round expected in 2011.

South China had 1.090% paying participating interest in this block.

SC-60 (GSEC-99 Offshore NE Palawan)

SC-60 joint venture comprised by South China, together with SPEX (Shell Philippines Exploration B.V.) and KUFPEC (Kuwait Foreign Petroleum Co. ksc) entered the second sub-phase of SC – 60 in July 2008. The objective is to continue and further the exploration of the block with a commitment to drill one well during this sub-phase.

The second sub-phase was extended by the DOE to February 10, 2011. This was so the SC60 JV partners would have sufficient time to commence and complete the drilling of the exploration well due to delays attributed to mechanical difficulties on the drillship Frontier Phoenix. To ascertain dependability of the drillship and ensure its proper operation and safety of ship and personnel, Operator SPEX used an alternate drillship. On July 20, 2010, the SC-60 JV spudded the Silangan-1 well, the first deep water drilled in the area using the drillship Atwood Falcon. South China was carried on this first well.

The well was plugged and abandoned without encountering significant hydrocarbons. Operator, SPEX, reviewed the well data to determine the cause of the unexpected results and identified appropriate next steps over the area. Using cutting edge technologies the Joint Operations launched a CSEM (Controlled Source Electro-Magnetics) survey during the second half of November 2010. The survey was undertaken by Electromagnetic Geoservices ASA (EMGS) using the vessel "BOA Galatea". EMGS employed their proprietary EM Technology to support the SC-60 Joint Operations in its search for offshore hydrocarbons. To give enough time to process the data obtained from the survey, a request to the DOE to extend the decision period to enter the third sub-phase by a year was made.

The DOE in its letter dated January 26, 2011 approved the request to defer commitment to enter the third sub-phased to February 10, 2012 and upon exercise of a commitment to enter the third sub-phase relinquish 25% of the original area.

A positive outcome of the survey will result in an accelerated exploration program. Within the extension period the Joint group will decide if it is to enter the third sub-phase and commit to drill another well by February 2013.

South China retains 15% interest in the block and is a paying partner after the first well.

SC-71 (formerly Area 4 Offshore Mindoro-Cuyo)

South China participated in the Department of Energy's Philippine Energy Contracting Round No. 3 (PECR-3). On April 1, 2009, the DOE awarded SC-71 to South China and UK company Pitkin Petroleum Ltd. (as operator), a block that covers the offshore Mindoro-Cuyo with an area of 1.164 million hectares.

The joint group embarked on a comprehensive seismic reprocessing of over 3000 line kms of 2D seismic data over the area for the first phase of work. It also included a reprocessing and re-interpretation of available gravity data. By year-end work was still ongoing. The first phase has been extended to April 1, 2011.

The joint venture completed comprehensive reprocessing of over 3000 line kms of 2D data as well as reprocessing of gravity data. The operator was unable to map any significant prospects and made the decision to relinquish SC-71 before April 1, 2011, prior to incurring any further commitments on the area under the succeeding phase. The Service Contract had term of seven (7) years compartmentalized into five (5) phases. South China had 15% participating interest in this block

Other Energy and Mineral Resources

The Company continues to focus on conventional energy resources as it explores entry into opportunities in other oil exploration areas as well as potential conventional and non-conventional energy resources. A new Petroleum Contracting Round (Philippine Energy Contracting Round 4, PECR4) is expected to be announced in 2011.

The global situation in recent years presents opportunities for the Company to seek entry into mineral exploration and exploitation sector. It recognizes that the demand added by China and India into the current global mineral resource market and into the foreseeable future will have a significant impact in the metals and non-metals market.
